

Midas #5790
MOOSE HILL POND
 LIVERMORE TWP,
 ANDROSCOGGIN CO., MAINE
 Area - 95 acres

MOOSE HILL POND

Livermore Falls Twp., Androscoggin County
U.S.G.S. Livermore Falls, Maine

Fishes

Smallmouth bass

Yellow perch

Chain pickerel

Hornpout (bullhead)

Redbreast sunfish

Pumpkinseed

sunfish

American eel

Physical Characteristics

Area - 95 acres

Maximum depth - 42 feet

Temperatures:

Surface - 72⁰F

40 feet - 47⁰F

Principal fisheries: Smallmouth bass, chain pickerel

The biological survey of Moose Hill Pond found habitat ideal for smallmouth bass. In 1958, smallmouth bass were introduced with the approval of the Livermore Falls Water District, who uses the pond as a public water supply.

Follow-up studies to determine the success of the bass introduction were done in 1963 and again in 1980. Both studies found numerous young-of-the-year bass indicating successful spawning. The 1980 study reported a noticeable lack of larger bass when compared with the habitat available.

Anglers are encouraged to cooperate with the Livermore Falls Water District who has willingly agreed to multiple recreational use on Moose Hill Pond.

Surveyed - August, 1957

Revised - 1963, 2001
